## **DETAILED ACTION**

The following is a quotation of the appropriate paragraphs of 35

U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

## A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(a or b) as being anticipated by Chem Abstract 133: 267744 or 133: 185304 or 133: 164431 or 133: 59158 or 132: 85386 or 131: 352186 or 130: 282433or 128: 210277.

133: 267744 discloses blue electroluminescent polymers of the claimed formula.

In said formula, if R1=R2=R3=R4=C6 alkyl, then said formula is read on that of the claimed formula.

133: 185304 discloses organic light emitting devices with active layers formed from blends for emission color control, having the claimed formula in that R1=R2=C8 alkyl, R3=R4=Hydrogen.

133: 164431 discloses light emitting diodes from fluorine based conjugated polymers, having the claimed formula in that R1=R2=C8 alkyl and R3=R4=Hydrogen.

133: 59158 discloses molecular design of light emitting polymers comprising fluorene based alternating copolymers, having the claimed formula in that R1=R2=C6 alkyl, and R3=R4=Hydrogen.

132: 85386 and 131: 352186 disclose blue polymer light emitting diodes from poly (9,9-dihexylfluorene-alt-co-2,5-didecyloxy-p-phenylene), having the claimed formula in that R1=R2=C6 alkyl, and R3=R4=decanoxy group.

130: 282433 discloses optical and electrical properties of fluorene based conjugated polymers, having the claimed formula in that R1=R2=C8 alkyl and R3=R4=Hydrogen.

128: 210277 discloses control of band gaps of conjugated polymers by copolymerization, having the claimed formula in that R1=R2=C6 alkyl and R3=R4=Hydrogen. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 703-308-2437. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 703-308-2462. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9791 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
